

To infinity and beyond...

QUOTES ABOUT TIME TRAVEL

"If time travel were possible, we'd be inundated with tourists from the future"

Stephen Hawking, author and scientist

"I don't want to travel through time. I don't like meeting my heroes, because I am always disappointed by who they are in real life. So I prefer to travel to the past by reading what people of the past wrote for us, and to travel into the future by working to keep humanity viable and smart"

Douglas Rushkoff, writer

"This is what makes time travel possible: the Flux Capacitor!"

Dr. Emmett Brown, *Back to the Future*
